### **WIHA E-SURUBELNITA, STARTER SET SPEEDEÂ® I ELECTRIC**

#### **Description**

Anyone who spends much of the day fastening screws knows how much time it takes and the considerable strain it causes to wrists over long periods of time. With the world's first e-screwdriver speedE® I by Wiha, such problems become a thing of the past once and for all! With the speedE® I, you fasten screws twice as fast as with a conventional screwdriver and still have full control over the tightening force thanks to the material protection function. On reaching 0.4 Nm, the power-assisted fastening switches off automatically to protect the material and users can finish fastening carefully by hand. Thanks to its award-winning SoftFinish handle shape, the speedE® I noticeably reduces strain on joints, tendons and muscles. It is recommended by German doctors and therapists at German Campaign for Healthier Backs for this very reason. The integrated LED light shines directly onto the screw and work piece that the user is working on. The e-screwdriver improves everyday efficiency, thanks especially to its compact design. With the standard rechargeable 18500 battery, at least 800 fastenings can be carried out with each charge. In combination with the VDE-certified slimBits, the speedE® I provides electricians with full protection during their daily work. A variety of different slimBit profiles offers a solution for every screw profile. Application  
Ideal tool for all screw-fastening tasks, such as: power socket installation, work in switch cabinets, industrial maintenance and installation, motorised equipment maintenance and repair, household appliances and white goods, window and door installation, heating, air conditioning and plumbing installation, and bicycle, motorcycle and lawnmower repairs. It is also perfectly suited for furniture assembly, repairs and other fastening tasks related to hobbies in the home. Greutate:818g  
Pret: 0,00 lei (TVA inclus)
