

IEK RIM BSI LM-50

Rim band and stainless steel braces are used for fastening protective profiles, brackets and other elements to power transmission line supports. The band is corrosion-resistant, sustainable to extreme temperatures, humidity and weather conditions.Rim band and stainless steel braces are used for fastening protective profiles, brackets and other elements to power transmission line supports.
The band is corrosion-resistant, sustainable to extreme temperatures, humidity and weather conditions.Width: 20
Material: EV000179
Material quality: EV000166
Surface protection: EV000154
Model: EV000118
Direction of punch holes: EV000250
Perforation: EV000494
Perforation diameter: -
Perforation width: -
Perforation length: -
Operating temperature range: -50...60
Length: 50
Thickness: 0.70
Pret: 434,49 LEI (TVA inclus)
