
IEK NEUTRAL BUS BARS WITH IZOLATORS 6X9MM 4/2 (4 GROUPS /FIXTURE AT THE EDGES)

Neutral non-insulated bus bars are used in electric panel equipment for connecting neutral operating (N) and protective conductors (PE). Bus is connected on the center (types 8/1; 14/1) and on the sides (type 8/2 and 14/2) through the neutral bus insulator onto a 35-mm DIN-rail and through the corner neutral bus insulators as well as directly onto the board panel. When connecting copper multicore wires to the buses, it is recommended to terminate them with terminal bushings. These buses are made of latten alloy.Made of brass. Wide range of models.Rated current In: 100
Material: EV000149
Type of surface: EV006034
Number of conduit outlets: 4
Sword length: 42
Type: IEK_V0000461
Attachment screws: EV009090
Nominal voltage: 400
Minimum section: 20
Max. conductor cross section: 1,5...10
Ambient temperature: -40...50
Number of buses: EV000599
Model: EV000154
Pret: 4,07 LEI (TVA inclus)
