IEK FLOOR DISTRIBUTION EMPTY ENCLOSURE SCHE-4 36 IP31 LIGHT

Used for assembly of the floor switchboard on 4 apartments intended for reception and distribution of the electric power in residential and public buildings, and also for protection of the departing lines at overloads and short circuits. The welded metal body consists of three compartments: input-accounting, distribution, low-current equipment compartment. In the input-accounting and distribution compartments there are DIN-rails for fixing meters (according to the number of apartments). The distribution compartment is equipped with DIN-rails for group lines and rail for busbar N and PE. The compartment is equipped with an operational panel. Compartment low voltage equipment provided with perforated profiles for the laying of television and radio networks, telephone lines, networks, burglar alarms, intercoms, etc. To ensure fire safety between low-current and power compartments located the partition. Boosted corrosion resistance.

High quality coating.

High performance and easy assembly.

Convenient mounting.

High electrical safety.

Empty enclosure sealing option.

Quality certificate. Mounting method: EV000383

Material: EV000160

Built-in depth: 950N...900N...140

Degree of protection (IP): EV006411

Number of device units: 40

Depth: 157

Width: 960

Height: 1000

Weight: 15.90

Ambient temperature: -60...40

RAL-number: 7035

Material thickness: 0,8

Pret: 0,00 lei (TVA inclus)
