IEK METAL PANEL SCHO 22.8.6

SCHO enclosures for distribution boards are designed for use in switchboards of 3-phase voltage 230/400 V AC 50 Hz in 4-wire and 5-wire systems with solidly earthed neutral, that serve for reception and distribution of electric power, protection of outgoing lines against overloads and short-circuit currents. SCHO enclosures for distribution boards are constructed as dismountable framework formed by vertical posts, vertical angles, side and face tie bars, to which door, side wall panels and roof are fixed (side wall panels and roof are to be ordered separately). Improved corrosion resistance.

Wide range of products.

High-quality external coating.

Unified parts make assembling of both typical and not typical LV switchgears more simple.

Door can be hanged to any side.

Range of additional accessories.

Dismountable construction of the board enclosure saves place in transport means and warehouse.

Wide posts enable installation of warning and control devices on their face surfaces.

Highly practical and simple assembling.

Convenient installation, transport and storage.

The enclosures can be joined in groups. Ambient class: IEK_V0000009

Primary current: 2000

Material housing: EV000179

RAL-number: 7035

Height: 2200

Width: 800

Depth: 600

Built-in depth: -

Type of cover: EV000116

Surface protection: EV008895

Door opening angle: 105

Type of installation: IEK_V0000113

Metal thickness: 2

Ambient temperature: -25...50

Number of modules: -

Type of door: EV002646

Plate thickness cabinet: 2.0

Plate thickness door/cover: 2

Cover model: EV000494

Pret: 0,00 lei (TVA inclus)
