### **IEK SCREW TERMINAL KWI-2,5MM2 ALBASTRU**

Screw terminals are designed for permanent, safe and compact connection of conductors of different cross sections in orderly distribution systems inside electrical cabinets. They are used to secure phase, neutral and protective conductors. Mounted on a DIN rail.

Terminal colors: gray, blue, yellow, green, red, black, orange, yellow-green

(PE). Insulation enclosure made of flexible and impact-resistant flame-resistant polyamide PA6.6, complies with UL94 V0 classification, has excellent resistance to corrosive environments and temperatures.

It is possible to connect conductors with nominal cross-section, both with and without cable lugs.

Extensive range of accessories: end caps, marking plates, jumpers.

Temperature over test (max 45°C).

Test to withstand a current of 120A per 1mm<sup>2</sup> for 1 second.
