	<p align="center"><b>IEK TERMOCONTRACTIBIL TTU 1,5/0,75 GALBEN 1 M</b></p> <p>The heat-shrink tubes from thin polyethylene are halogen-free and have fire suppression property. The products have good electrical and mechanical properties and are used as insulating and sealing materials. Being heated after putting in stretched state on various items, they shrink and fit close to an item, assuming its shape. The heat-shrink tubes have the following color options: white, yellow, green/yellow, green, red, blue and black. A wide range of different tube diameters for working with conductors of different sections.</p> <p>The material of the tubes does not contain halogens and are flame-retardant.
