WIHA SCULA DEZIZOLARE- | 165 MM

Description
Electricians need to trim and skin cables at times when installing electrical systems. Their equipment would be incomplete without a stripping tool. Thanks to its ergonomic handle shape, the Wiha cable stripping knife can be held perfectly in the hand. The continuously adjustable cut depth per adjustment screw allows users to skin all standard round cable gauges between 4 mm and 28 mm comfortably. The cable stripping knife automatically switches from a round cut to a lengthwise one thanks to the self-rotating inner knife. The self-clamping holding device also ensures reliable cable routing. A safety cap covers the knife and its hooked blade during transport and storage. The tool handle contains a spare blade.

Application
Precise, fast and safe stripping of all common round cable from o 4 mm – 28 mm.
Self-turning inner cutter for circular and longitudinal cutting.

Greutate:83g
Pret: 87,44 LEI (TVA inclus)
