

WIHA TORQUEVARIO®-S ELECTRIC NUT DRIVER INSERT 1/4" SET

Description

Many different screw profiles are required for work at different locations, such as electrical enclosures and electric installations. The 10-pcs. set covers the most common screw connections with its selection of nut driver inserts and is thus flexible in its use. When combined with speedE®, slimVario® and TorqueVario® tools, the nut driver inserts can be used to tighten and loosen hex screws. Safely stored away and tidily arranged in a robust folding bag, these electrician tools are perfect for portable use. The bag also offers ample space for other slimVario® and TorqueVario®-S products. The fully insulated tools prevent potential short circuits caused by unintentional contact, even in confined working environments. Each tool in the set has undergone an individual piece test as per the international IEC 60900 standard, allowing users to work safely on live parts up to 1,000 V AC.

Application

For working on live parts up to 1,000 V AC. Ideal for use in a confined working environment or when out on jobs.

Greutate:419g

Pret: 1.074,59 LEI (TVA inclus)
