WIHA BIT SUBTIRE SET

Description
To reach low-lying screws, the blade diameter is often too large in conventional electric screwdrivers. Because removing insulation is not permitted and also compromises the user's safety, protective insulation has been integrated into the blade with the Wiha slimTECHNOLOGY. This has been specially developed for electrical applications, thereby ensuring blades up to 33% slimmer. This means low-lying screw and spring elements can also be easily reached with the slimBits. The insulated slimBits undergo individual piece testing as per the international IEC 60900 standard, *providing users with a tool to work safely on live parts up to 1,000 V AC. The slimBits are stored away in two interlinked bit boxes, which provide an optimum view of screw profiles. Thanks to the supplied belt clip, the slimBit boxes are the perfect companion while out on jobs.

Standards
Manufactured acc. to IEC 60900.

Application
Suitable for controlled fastening for live parts up to 1,000 V AC, especially for portable use.

Note
The 6 mm slimBits can only be used with speedE®, slimVario® or TorqueVario®-S electric tools.

Greutate:204g
Pret: 481,70 LEI (TVA inclus)
