WIHA HACKSAW ELECTRIC

Description
During electrical installation work, electricians often have to use a hand saw to cut pipes or cable ducts to length. Wiha now offers the perfect solution: The hacksaw electric. Thanks to its insulated handle, it offers full protection during work on live parts up to 1,000 V. The 300 mm-long saw also boasts an ergonomic handle that ensures comfortable work for left-handed users. Furthermore, the set includes two replacement saw blades with a length of 150 mm. If the teeth are blunt, the blades on the electrician's saw can be replaced quickly and easily. The plastic screw enables easy clamping and adjusting of the saw blade.

Application
For sawing plastic pipes, electrical installation pipes and plastic or metal cable ducts. Ideal for the application field of electricians and electrical specialists.

Greutate:570g
Pret: 256,87 LEI (TVA inclus)
