

LEGRAND* SINGLE PHASE FILTEROSU RECTIFIED POWER SUPPLY - 12 V= - 15 W- 1.3 A - 5 MODULE

Caracteristici tehnice
Filtered rectified Tensiune de alimentare - 12 VDC
Comprising:
a safety transformer with interference filtering
a filter capacitor
protection by PTC integrated in the primary
double operating terminals
PTC: Positive temperature coefficient. In the event of an automatic cut-off due to an overload or short circuit, switches off the Tensiune de alimentare and allows it to cool down before switching on again
Putere : 15 W
Current : 1.3 A
Terminal capacity flexible cables – Input : 6 mm²
Terminal capacity flexible cables – Output : 6 mm²
No. of module : 5
Caracteristici generale
BUS/SCS nurse call unit - secure wandering device
Pret: 502,38 LEI (TVA inclus)
