

IEK TERMINAL CLIPS PENTRU BUSBAR ZSHI 70-120 MM2 10 MM

Multipurpose clamps (terminals) are designed to connect conductors with cross-sections from 1 to 185 mm2 to flat copper and aluminum buses with a thickness of 5 or 10 mm for subsequent removal of voltage on the installed equipment. The use of open terminal block makes the process of connection of conductors as simple and fast as possible. The clamps are made of galvanized steel, they provide protection against temperature influences.An additional spring plate provides a secure clamp on the busbar and significantly reduces the "self-unscrewing effect".Max. conductor cross section: 120
Branch conductor section: 70...120
Ambient temperature: -45...+85
Busbar thickness: 10
Busbar width: 5...120
Suitable for: EV009241
Max. rated operation current Ie: 440
Pret: 17,13 LEI (TVA inclus)
