

IEK ETICHETE PENTRU KPI-6MM2 WITHOUT SYMBOLS

Marking plates (markers) are used to mark rows of spring-type terminal assemblies (KPI terminals) in distribution systems. They are installed in the corresponding slots jf the terminal. They are made in the form of plates with ten marking pads. Each pad can be easily disconnected from each other. Marking plates are made in two versions: for central and lateral placement. Markers may also be marked with symbols such as numbering Nos. 1-10 or the symbols such as "L1, L2, L3, N, PE". They are made of plastic.More possibilities for marking simplify the operation of implemented solutions.Model: RV000133
Material: EV000139
Colour: EV000202
Conductor cross section: 6
Symbol: ??? ????????
Length: 82
Width: 11
Ambient temperature: -40...+85
Application: IEK_V0000787
Imprint: EV000494
Mounting method: EV007635
Shape: EV000382
Pret: 1,05 LEI (TVA inclus)
