

IEK SUSPENSION BRIDA S TO A COLUMN KS-4

Facade fastening kit of KFK type are intended for suspension fixation and batch bundling of self-supporting insulated conductors (SSIC) under 1 kW on bearings and building walls. Bodies are made of polymer resistant to UV and weather conditions. Dowel part of fixtures is installed into 12 mm hole and fixed with a nail. KFK kits are supplied with a special channel allowing carrying out laying the second cable line along the existing one using a HS strap. Fastening sets are intended for facilitating SSIC mounting when arranging branching from the bearings or connecting SSIC to the building. 1) KAM-4000 — 1 pcs. 2) ZOI 16-95/2,5-35 — 2 pcs. 3) ZAB 16-25 — 1 pcs.Fastening sets are intended for facilitating SSIC mounting when arranging branching from the bearings or connecting SSIC to the building.Material: EV000154
Nominal voltage: 1000
Type of fastening: EV000154
Thread size metric (M..): 8
Flange thickness: -
Tube/cable diameter: 4,50…5,65
Pret: 102,96 LEI (TVA inclus)
