

IEK HOOK SHEAVE ROR-1 (ST26.1)

ROR pay-out rollers are the tools used for pay-out of SBIW along the intermediate poles of power transmission lines. ROR-1 rollers are hanged onto a bracket using turning hook with latch that prevents the roller from slipping out. Maximum diameter of the cable that can be mounted using the rollers is 50 mm. The ROR-1 rollers are intended for use only with little angles of power transmission lines turn, up to 30°.The maximum diameter of the cable mounted with rollers is 50 mm.Ambient temperature: -60...55
Clamping cable diameter: -
Cable diameter: ? 50
Number of cables: 1…4
Max. tensile load: 8000
Length: 96
Width: 115
Height: 245
Destructive load of real perpendicular SIP: 8
Roller diameter: 115
Width of roller slot: 54
Pret: 167,64 LEI (TVA inclus)
