

IEK PRIZA 213 PORTABLE 2P+PE 16A 220V IP44

The power connectors are indispensable devices for use indoors and outdoors, together with mobile electrical equipment with cable supply system and stationary equipment of single- and three-phase types. They can be used for connection of construction electrical equipment and tools, machine-tools and other industrial equipment, power supply of workers' cabins and booths, for use in hotels, vacation houses, camp sites, etc.The bodies and insulating parts that support the currentcarrying parts of the power connectors are made from heat-resistant and self-xtinguishing materials.
The securely attached covers protect from ingress of dust and moisture into the connector.
Corrosion protection for springs.
Screws in mechanical and electrical connections are secured from self-unfastening.
Operation in moist environment is possible (IP44, IP54).
Special gland is available for cables of various sizes.
Free space for cable.IEC-amperage: 16
Operating voltage range: 200-250
Nominal frequency: 50
Nominal electric insulation strength: 500
Number of contacts: IEK_V0000071
Degree of protection (IP): EV006418
Clock hour position: 6
Number of poles: 2
Material: EV000139
Identification colour: EV000080
Connection system: EV001008
Cable entry: EV004016
Presence of lock: IEK_V0000070
Ambient temperature: -25...+40
Voltage acc. EN 60309-2: EV000154
Angle of plug: EV000164

Pret: 18,22 LEI (TVA inclus)
