

IEK TEST SCREWDRIVERS OP-1

OP-1 and OP-2e are modern and efficient devices of new generation that can quickly and safely check the following parameters: AC and DC voltage, polarity, circuit integrity. Simple design, minimum sufficient set of functions. Type of test: EV000067

Voltage indication: EV000432

Voltage measurement range: 70...250/70...600

Resistance test range: 0...50000

Mains frequency: 50...500

Indication of electro-magnetic fields more than: 5

Ambient temperature: -10...50

Current supply: EV000389

Definition of voltage circuit integrity: 1,5...36

Resistance indication: EV000428

Pret: 14,09 LEI (TVA inclus)
