

GTV SPOT - CEILING LIGHT FIXTURE RESTO, PC, ?80X125MM, IP20, MAX 20W, ROUND, WHITE

Resto LED surface-mounted ceiling lamp fixture – stylish and innovative
The Resto surface-mounted ceiling lamp fixture is a
refined model of light with a
modern twist. The visual design is driven by simple geometric figures. It stands out from its background while keeping reserved, minimalist lines. It certainly adds refinement to the interior. It is suitable for office and public spaces; it also blends well with rooms at private homes. The simple form makes it effortless to create interior designs in a
variety of styles with the lights from the Resto collection.
The Resto surface-mounted lamp fixture is made entirely of polycarbonate. The material makes the fixture extremely robust, durable and resistant even to heavy-duty use, while the smooth surface of the plastic adds to the lamp’s fashionable style.
The Resto surface-mounted spot fixture is available in two different shapes – square or circular – and two basic colours, white or black. The Resto light provides light beam direction adjustment for each light source.
The only compatible type of light source should be LED lamps with a
maximum power of 10
W.
For LED lamps only
