

**GTV CORP DE ILUMINAT PENTRU EXTERIOR - GARDEN LUMINAIRE CORTA-P PIR
40, E27, MAX.25W, IP44, AC220-240V, 50-60HZ, POST, GRAPHITE**

Geometric shapes are the hallmark of modern design that has been the most frequently chosen style by architects for many seasons.

CORTA series of fittings is in line with modern arrangements of gardens and building facades. A milky cover made of durable polycarbonate effectively softens and disperses the light. Any light source with an E27 thread and power not exceeding 25

W can be used as a

light source. Thanks to this, each user can adjust the intensity and colour temperature of the light to his own arrangement.

Thanks to the use of a

PIR motion sensor, paths in the garden will be illuminated only when necessary, thus saving electricity consumption. The PIR (infrared) motion sensor detects human body heat, and if it is within the detection range of the sensor, the device will work. Built-in infrared motion sensor;

Corrosion-resistant aluminium body;

Milky cover dispersing the light;

Modern, cylindrical form. Producent code OS-CORP40P-30

Pret: 0,00 LEI (TVA inclus)
