

GTV LAMPA TAVAN - SUSPENDED LUMINAIRE TRESOS II, 3XGU10, ALUMINUM, IP20, MAX. 3X20W, WHITE

LED pendant light Tresos – a refined taste of elegance

Suspended ceiling fixture Tresos is an excellent choice for Scandinavian, minimalist and modern interiors. Its subtle formula perfectly matches the character of the interior, complementing it with a charmingly modest line.

The universally simple design meets the needs of modern kitchens, as the kitchen island lighting, table lighting in a

dining room or ceiling lighting for a

living room. The discreetly non-intrusive form blends with any type of furniture and it is a stylish “dot some i’s” in a

refined in details arrangement.

LED ceiling lamp Tresos is made of high-quality aluminium in a

universally subdued white and distinguished black. The round fixtures correspond gracefully with the light line of the lamp design. Thanks to three separate light points, the light beam is relatively wide and perfectly copes with introducing a

warm atmosphere of cosiness in the interior. The suspended LED luminaire has adjustable cable length that allows for the suspension height to be adjusted to individual needs. Modern design;

Adjustable cable length;

The perfect solution for lighting a dining table or the kitchen island;

max. 3×20

W;
