

GTV SPOT - WALL FIXTURE ARALIA, AC220-240V, 50/60 HZ, G9, MAX.20W, IP20, SINGLE, BLACK

The Aralia ceiling lamp fixture – refined elegance
The modern Aralia ceiling lamp fixtures are a
series that is designed with modern look and feel in mind, combined with functional convenience. The fusion of smart-looking aluminium in silver with a
smoked glass lens speaks a
refined design language. It works well on sales floors, administrative venues, office spaces, and living spaces. The subtle visual style fits in with both classic, Scandinavian, modern and minimalist styles.
The Aralia ceiling lamp fixture has an adjustable casting angle. It is compatible for G9
base lamps.
The ceiling lamp fixtures in this collection are available in four versions which — together or separately — offer a
very wide range of design possibilities. The single-spot version — with one arm on a
circular base — is minimalist and subtle. The two-spot version — with two arms on a
long rail — is easy to arrange and adapt to any style of interior design. Three-spot version on a
circular base provides comfortable lighting for a
fairly large area. The four-point version on two long rails illuminates the space well while remaining minimalist in its design.
Built-in G9
socket
Smoked glass lens Dedicated to G9
light sources
The luminaire’s inclination angle can be adjusted
Modern design Material glass + metal
Base type G9
